

**INTERTANKO**

**INTERCARGO**

## **JOINT FEEDBACK FORUM**

INTERTANKO ,INTERCARGO and ILAMA (International Life-Saving Appliance Manufacturers Association) have launched a joint feedback forum which gives the opportunity for all end-users (crews) of lifeboats and other Life Saving Appliance (LSA) equipment to provide their comments, thoughts and input to the manufacturers of such equipment.

The aim of the forum is to produce feedback and input to the manufacturers which will help to improve the design of life saving equipment and thereby enhance safety in the industry, taking a crucial step towards achieving the goal of zero fatalities.

Currently, the manufacturer's greatest problem is the lack of feedback from end-users who through this forum are encouraged to provide comments and suggestions and progressive feedback on how they see equipment could be improved in order to minimise accidents, enhance safety and improve ergonomic design.

INTERTANKO as well as INTERCARGO has asked its members to inform their crews of this forum and the possibility for their feedback to reach the manufacturers. All information is guaranteed to be handled in the strictest confidence and INTERTANKO will collect and assess the feedback and provide the information to ILAMA for further distribution to the appropriate recipients.

The forum is open to all crews no matter what their ship type.

We believe that this exciting pilot project is being adopted by other marine organisations.

### ***PLEASE INFORM US OF YOUR CONCERNS***
